

BLS for the Healthcare Provider

(Now known as HeartCode/BLS)

PLEASE READ

Many students are arriving at the skills session with the wrong certificate of completion. We can only accept the American Heart Association HeartCode/BLS for the Healthcare Provider Certificate (Now referred to as HeartCode/BLS.) When registering for Part I, be sure to only go to www.onlineaha.org/courses/84.

The screenshot shows a web browser window displaying the HeartCode BLS course page. The page features a dark header with the 'HeartCode® BLS' logo and navigation tabs for 'Overview', 'FAQs', and 'Continuing Education'. Below the header, the course is listed as 'Online' with a price of '\$28.50' and an 'ADD TO CART' button. The course is described as a '2.0 Hour Course' and includes a video player showing a simulation of a healthcare provider performing CPR on a manikin. The page also contains detailed text about the course's content and learning objectives.

HeartCode® BLS

Overview | **FAQs** | Continuing Education

Online 15-1400

2.0 Hour Course \$28.50 **ADD TO CART**

Accessible version available for students with hearing, vision, and/or motor impairments

This course replaces the BLS for Healthcare Providers Online Part 1 (#90-1403), HeartCode BLS Part 1 (#90-1404), and BLS for Prehospital Providers Online (#90-1433) 2010 Guidelines courses.

HeartCode BLS uses the latest eSimulation technology to enable students to assess and treat patients in virtual healthcare settings. Utilizing a variety of eLearning assets such as dramatizations, eSimulations, animations, self-directed learning, and interactive activities, this course teaches BLS knowledge and skills. This method of learning provides training consistency, adaptability to different learning styles, and flexibility for the student's and employer's time. Students can work at their own pace applying their knowledge to real time decision making and skills development. Blended training also supports the need for hands-on learning of psychomotor skills. Debriefings and coaching are provided immediately after each simulation.

Once the cognitive portion of the course has been completed, students practice and test their skills with an AHA Instructor or on a voice-assisted manikin (VAM) system.

After successfully completing both the eLearning and hands-on session of the BLS Course, students should be able to:

- Describe the importance of high-quality CPR and its impact on survival
- Describe all of the steps of the Chain of Survival and apply the BLS concepts of the Chain of Survival
- Recognize the signs of someone needing CPR
- Perform high-quality CPR for adults, children and infants

Other sites advertise this course for less money but when you arrive for the skills session you will not be permitted to participate unless you have the correct certificate. Students who have made this error must repay for the correct online course. If you have any questions please call our office at 518 629-7339.
