Critical Care Transport

Purpose

This intensive course offers the foundation which will prepare the paramedic or nurse to become a critical care transport specialist. The 100+ hour course covers a wide variety of critical care topics, including:

- The Critical Care Environment
- Breathing Management
- Surgical Airway Management
- Hemodynamic Management
- Cardiac Management
- Pharmacological Management
- GI, GU, and Renal Management
- Neurological Management
- Transport Considerations
- Special Considerations
- Cadaver Lab
- Mechanical Ventilation Lab

We will attempt to schedule tours and “ride along” for those students interested. Students with 100 percent attendance will be evaluated with a written examination at the end of the course. Upon successful completion, the student will receive a renewable certificate from UMBC valid for three years.

Lodging information

There are several hotels within a few miles of the facility. A list of the hotels will be provided upon request. It is up to the participant to secure their accommodations.

Critical Care Emergency Medical Transport Provider

The Critical Care Transport Program was designed by the University of Maryland, Baltimore County to prepare paramedics and nurses to function as members of a critical care transport team. Critical patients who must be transported between facilities require a different level of care from hospital or emergency field patients.

The Critical Care Transport Program brings paramedics and nurses together in an effort to bridge the gap between prehospital and hospital care. The result is a specialized care provider who has an understanding of both aspects of patient care and provides the highest level of care to critical patients during transport.

Tuition

Tuition for this course is $1,100. Please make the check payable to Hudson Valley Community College. Credit cards are also accepted. Enrollment is limited to 25 persons. We reserve the right to cancel or reschedule the course depending on enrollment.

Attendees

The CCEMTP℠ course is open to any paramedic or nurse who has worked in that capacity for at least one year. Current CPR, ACLS, PALS or PEPP or ENPC or PPC is required. Copies of your certification cards, including RN license and/or paramedic, must be submitted prior to registration via email, fax or USPS mail. You will then receive an e-mail detailing how to pay for the course.

Continuing Education

CEUs are approved by the Regional Emergency Medical Organization. This continuing education activity is approved by UMBC, an organization accredited by the Continuing Education Coordination Board for EMS (CECBEMS).

Faculty

Instructors may be physicians, nurses or paramedics with extensive experience in critical care and critical care transport. All instructors are approved by the Hudson Valley Community College Paramedic program and UMBC.
