Title: Off-Specification Chemical Management

Regulatory Citation: Not Applicable

Applicability: Off-specification chemicals generated in the Photography Department.

Purpose: Proper management of off-specification chemicals managed by the Photography Department.

Person or Department Responsible: Photography faculty

Schedule: End of Spring Semester

Procedures: At the end of Spring Semester the Photographic Faculty will inspect the Department for off-specification chemicals. If any off-specification chemicals (i.e. out of date, etc.) are noted within the Photography Department, the Photography Department Faculty shall provide the Coordinator of Environment Health and Safety with the chemical name, manufacturer, quantity and an MSDS of each chemical. The Coordinator of Environmental Health and Safety will review the inventory of chemicals determine their classification (i.e. hazardous or non-hazardous), proper labeling of the chemicals and make arrangements with the approved chemical disposal contractor to remove the chemicals. In addition, the Coordinator will arrange for transfer of the chemicals to the outdoor chemical storage shed at Cogan prior to shipment off-site.

Record keeping: Original manifest will be prepared by vendor and signed by the Coordinator of Environmental Health and Safety

Record Location: Original Physical Plant Office.
